

HomeShelter™ **PRD**

Panic Room Door

Information for Specifiers,
Resellers and Installers

HomeShelter™ Panic Room Door

HomeShelter™ PRD

A revolutionary new affordable product! Turn any room in a home or business into a safe room for emergencies. Simply replace the standard door giving access to the room with an aesthetically pleasing HomeShelter™ PRD that is not only bullet resistant, but will also withstand extreme brute force attack.

Why a HomeShelter™ PRD

Create a safe room for your security conscious commercial or residential clients without being subject to the complications, disruption and high costs of building alterations.

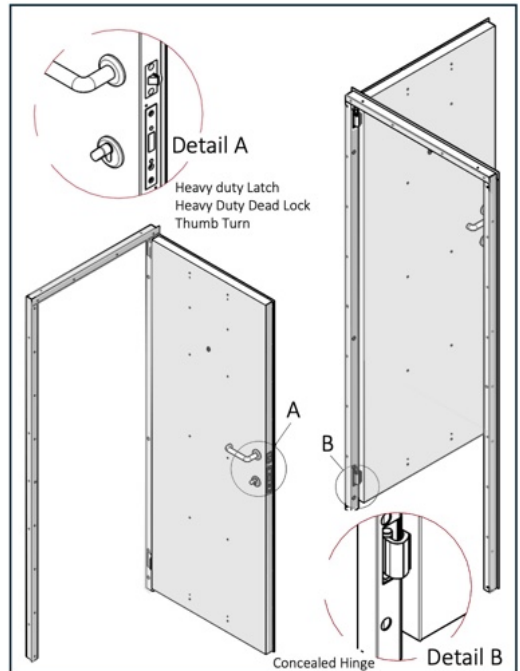

Key Benefits

- Off-the-shelf universal application suitable for any standard steel door frame.
- No “wet works” required for installation, with minimal intrusion into doorway space.
- Bullet resistant and impervious to all forms of hand inflicted brute force attacks.
- Concealed hinges, solid steel sheet overlaps the door frame eliminating all the usual door vulnerabilities targeted by intruders.

Standard Features and Options

One product in left or right hand, for in or outward opening. The PRD will fit standard steel door frames in widths from 806 to 813 mm and height from 1975 to 2030 mm. Some customisation is possible for small deviations but best to CHECK THIS BEFORE ORDERING!

Locking: Tec 60mm backset deadlock, with solid steel 35 x 12mm bolt and separate heavy duty latch.

Feature	Standard HomeShelter™ PRD	Optional
Opening direction	Outward opening	Inward opening
Key operation	Key operation on the outside and a thumb turn on the inside.	• Key both sides. • Only thumb turn inside (no key outside).
Lock	Euro cylinder lock and 2 keys.	Cylinder lock omitted
Latch and handles	Union latch, stainless steel handles	“Industrial” cutout - no latch, no handles
Finish	Spray painted grey QD Prima coat.	Powder coat
Accessories	Peephole	• QP™ Gunport. • Bullet resistant window. • Fire resistant or acoustic filler.
Ballistic Rating	Class FB4 (.44 Magnum FJ/FN/SC handgun)	Class FB6 (7.62x39 AK47 FJ/PB/SC)

Installation

Supplied complete with mounting frame, proprietary concealed hinges and installation kit. The PRD frame is bonded to the existing door frame and secured with screwbolt fasteners that are supplied in the kit. These are designed to be screwed directly into holes drilled in concrete or hard brick or soft brick. No other wall anchors are required. Trained contractor installation is recommended.

Installers require instructions and tools as below:

- Drilling machine with 6 mm x 150 mm masonry and 4,0 mm HSS bits
- Angle grinder with cutting disc for steel and hacksaw
- Torx #27 or #30 driver.

Dimensions and Weight

The **HomeShelter™ PRD** has a built-in height compensation feature.

- Thickness of uncoated steel door 47 mm.
- PRD frame Intrusion into doorway space 10-15 mm each side.
- Door height compensation range 50 mm.
- Weight of standard PRD with frame 84 kg.

Quality

The **HomeShelter™ PRD** is exclusively manufactured by SA Safe Equipment for supply to trusted retailers and installers. SA Safe Equipment has served the South African market for over 50 years with uncompromising commitment to superior products that combine quality and security.

Manufacturing complies with an ISO 9001 based Quality Management System.

Ballistic Rating

Bullet resistance proven by ballistic test in a SANAS accredited laboratory. Meets Class FB4 to the EN1522 standard (i.e. 44 Magnum FMJ handgun).

Tips

Teach family members and/or employees about the facility and how to use it in emergencies. Equip the room with:

- An armed response wireless panic button.
- A mobile phone with air time ready to use independently of Wi-Fi.
- A list of emergency contact telephone numbers.
- Emergency lighting independent of the premises' electrical system.
- Drinking water.
- First aid kit, blankets, seating.
